SUBJECT INDEX

Volume 112

Active turbulence, 199
Advection, 587
Atmospheric surface layer, 199

Baroclinicity, 57, 283
Boundary layer
  Coastal, 587
  Cloud-topped, 179
  Convective, 57, 179, 223
  Marine, 587
  Nocturnal, 159
  Scaling, 503
  Stable, 241, 257, 283
Building array, 427

Canopy
  Forest, 467
  Flow, 107, 129, 307, 343
  Sublayer, 129
  Waves, 129
Closure model, 1, 467
Cloud-topped boundary layer, 179
Coastal zone, 587
Coherent structures, 107, 199, 307, 343
Conditional sampling, 307
Convective boundary layer, 57, 179, 223
Countergradient fluxes, 179

Direct numerical simulation, 223
Dispersive stresses, 427
Diurnal warming of ocean, 381

Entrainment, 223
Entrainment flux, 179

Flow prediction, 557
Flux
  Countergradient, 179
  Footprint, 467, 503
  Heat, Interval, 241
  Sensible heat, 241, 369
  Threshold value, 241
  Turbulent, 159

Footprint
  Flux, 467, 503
  Function, 467, 503
  Prediction, 467, 503
Forest, 129, 467

Greenland, 283

Hairpin votices, 199
Heat fluxes, 241, 369
Heterogeneous surface, 467
Horizontal gradients, 381

Interfacial layer, 57
Intermittency, 159, 343
Intermittent turbulence, 241
Isolated ridges, 525

KABEG, 283
Katabatic wind, 283
Kelvin–Helmholz instability, 1

Lagrangian stochastic model, 503
Large-eddy simulation, 1, 57, 81, 107, 179, 257, 307, 343
Local
  Scaling, 283
  Wind variations, 557
Low-level jet, 283

Maximum speedup, 525
Microfronts, 107, 307
Monin–Obukhov theory, 199, 587
Mountainous terrain, 557

Navier–Stokes equations, 427, 467
Nocturnal
  Boundary layer, 159
  Flow, 129
Non-local transport, 179
Numerical
  Model, 427, 467, 557
  Simulation, 223

Organised turbulence, 307, 343

Parameterisation, 503
Plant canopy, 467

Quasi-wavelet spectrum, 33

Radiation
  Fog, 1
  Perturbations, 129
Ramps, 129, 307
RANS, 427
Remote sensing, 381
Resolution sensitivity, 257
Reynolds
  Averaging, 427
  Stresses, 427

Scalar
  Hypotheses, 257
  Microfronts, 107
  Ramps, 307
  Transport, 81, 129
Scaling laws, 369
Sea breeze, 369
Sea surface temperature, 381
Sensible heat flux, 241, 369
Spectrum
  Turbulence, 33, 81
  Von Karman, 1
Stable boundary layer, 241, 257, 283
Stratocumulus, 179
Subgrid-scale
  Model, 81
  Coefficients, 81

Terrain-induced turbulence, 557
Turbulence
  Active, 199
  Closure model, 1, 427, 467
  Flow, 427, 525
  Fluctuations, 33
  Fluxes, 159
  Intermittent, 241
  Organised, 307, 343
  Organised structures, 343
  Spectrum, 33, 81
  Statistics, 283
  Terrain-induced, 557

Urban flow, 343

Valley flow, 159
Von Karman spectrum, 1

Wavelet transform, 307
Wind profile, 587
Wind tunnel, 223, 525
